

Ntshovelo, our beacon of hope

The 25th of November 2022 was a fulfilling day for Ntshovelo Colliery, as they embarked on promoting employee wellness, informing, educating, and creating awareness at the beginning of the 16 Days of Activism against GBV. Midway the 16 days, was HIV/AIDS Awareness Day, which they took on with just as much vigour.

Attendees to the events were Mbuyelo Management employees; all Ntshovelo team members; DMR; CANSA; FOVOC; Khulisa Solutions; local dentist Dr F Talane; Herbalife consultants, SAPS and Old Mutual. The highlight of the GBV event was the signing of the Ntshovelo GBV Pledge by all stakeholders attending this auspicious event.

The cherished Gogo Sithole's house was handed over on the second day of December 2022. This house was built specifically for the challenges our gogo faces on the daily trying to live a normal life. It is wheelchair-friendly and cosy, perfect for the disabled elderly lady.

When you thought they have touched your heart with coming on a white horse for Gogo Sithole, Ntshovelo identified another deserving individual. A passionate local who had pitched a corrugated structure to put bread on their table by washing cars, was next on the list for some magic dust to make their efforts even more effective. Ntshovelo handed over a fully functional carwash to this gentleman from Arbor as a form of Enterprise Development on the same day.

Along with equipment, a container and structural renovation, the mine assisted this young man to register his business formally. What a way to empower your fellow brothers and sisters Ntshovelo!
